Universul (6 March 2022)

Russias defense ministry has warned countries including NATO member Romania against hosting Kyivs military aircraft, saying they could end up being involved in an armed conflict.

Defense ministry spokesman Igor Konashenkov said in a video briefing that some Ukrainian combat planes had redeployed to Romania and other Ukraine neighbors that he did not identify.

Warplanes

He warned that if those warplanes attacked the Russian forces from the territory of those nations, it could be considered as those countries engagement in the military conflict.
