Daily Sabah (15 December 2024)

Türkiye achieved its highest-ever November export volume to Kyrgyzstan, reaching \$88.4 million, marking a nearly 28% rise compared to last year, according to a report on Sunday.

The increasing volumes show that the country continues to break export records in alternative markets. Strengthening relations with these markets yields positive results, significantly contributing to bilateral trade volumes.

As part of President Recep Tayyip Erdoğan's visit to Kyrgyzstan last month, 19 agreements were signed between the two countries.
