
JERUSALEM'S ARMENIAN QUARTER MOST TARGETED BY ANTI-CHRISTIAN INCIDENTS IN ISRAEL, REPORT SAYS

-

08.07.2025

Asbarez (7 July 2025)

The Religious Freedom Data Center has released its latest quarterly report, documenting 50 hate incidents against Christians in Israel between April and June 2025. The report reveals a troubling rise in targeted attacks, particularly in Jerusalem's Old City, where 50 percent of incidents occurred in the Armenian Quarter.

According to the data outlined in the report, 64 percent of the recorded incidents took place within the Old City walls, with half of those centered around the Armenian Patriarchate of Jerusalem.

This makes it the single most frequently targeted Christian site. Other major hotspots included Jaffa Gate and David Street (25 percent), Via Dolorosa (13 percent), and Chabad and HaAshurim Streets (6 percent each).
