Adlet Seilkhanov

The European Bank for Reconstruction and Development (EBRD) is helping micro, small and medium-sized enterprises (MSMEs) in Uzbekistan to improve their access to green finance and promote green innovation by providing fresh funds under its Uzbekistan Green Economy Financing Facility II (GEFF II Uzbekistan), ebrd.com reports.

An EBRD loan of up to US\$30 million (۳۰۰۰۰ million) under GEFF II Uzbekistan will allow Hamkorbank to expand its energy-efficiency lending to companies and households across the country, who can use the funds to modernise production, increase their energy efficiency and improve their climate resilience. The loan will be supported by concessional co-financing provided by the government of Canada under the High-Impact Partnership on Climate Action (HIPCA).
