Head of State Kassym-Jomart Tokayev has shared his vision for the countrys development in 2026 in an extensive interview with Turkistan newspaper, Qazinform News Agency reports.

"As I have said, the year ahead will be challenging. A new stage of large-scale political transformation begins, and economic reforms will be advanced. The modernization of the country must become truly irreversible, fundamentally changing the essence and image of our society. Citizens will need to adapt to the realities of a new era. This is not an easy task, but I am convinced that our people, especially the youth, are capable of doing it, the President said.

Tokayev reminded that 2026 has been declared the Year of Digitalization and Artificial Intelligence.
