
KAZAKHSTAN TARGETS MAJOR GAS PRODUCTION BOOST WITH NEW PROCESSING PLANTS

-

13.07.2026

The Caspian Post (12 July 2026)

Kazakh Energy Minister Yerlan Akkenzhenov has announced that Kazakhstan plans to increase its marketable natural gas production to 35.5 billion cubic meters by 2032, as the country accelerates investment in new gas processing facilities.

The minister said that Kazakhstan is expected to produce 27.4 billion cubic meters of marketable gas in 2025, with future growth driven by the launch of several major gas processing plants, The Caspian Post reports via Inbusiness.kz.
